LUXEMBOURG CUSTOMS CLEARANCE SYSTEM

AES Conformance Testing for Economic Operators

Programme	Luxembourg Customs Clearance System
Subject	Export Conformance Testing for Economic Operators
Version	1.00
Release date	21/05/2024
Document reference	LUCCS-2025-MIG-AES P1

TABLE OF CONTENTS

1 INTRODUCTION

1.1 PURPOSE OF THE DOCUMENT

The purpose of this document is to describe test cases to be executed during the Conformity Test with economic operators in the frame of Export.

1.2 INTENDED AUDIENCE

The present document is intended to be read by the following people:

- B2G Economic Operators

1.3 OBJECTIVE, TEST DURATION & CONTACT DETAILS

Objective of the conformance testing	Confirm that the Economic Operator is able to successfully send all sorts of Export declarations and receive the successive notifications induced by the processing of the said declarations
Contact details	Servicedesk eDouane Email : servicedesk@do.etat.lu Phone : (+352) 2818 2000

LUCCS
MODERN AN EFFIZIENT

1.4 CONFORMANCE TEST CASES

The Conformity Test are divided into 11 parts:

Process	Number of Test Case	Mandatory
Process – Export Customs Declaration at office of export	4	X
Process – Export Customs Declaration at office of exit	5	
Process – Control by office of export	2	X
Process – Control by office of exit	3	
Process – Exit after storing	3	
Process – Handle Right to be heard	4	X
Process – Amendment of an Export declaration	5	X
Process – Invalidation of an Export declaration	4	X
Process – Declaration Submission prior to presentation of the goods	3	
Process – Correction of the Pre-Lodged declaration prior the presentation of goods	3	
Process – Cancellation of the Pre-Lodged declaration prior the presentation of goods	3	
Process – Enquiry initiated by the economic operator	3	
Process – Documents attachments	3	X

1.4.1 PROCESS – EXPORT CUSTOMS DECLARATION AT OFFICE OF EXPORT

ID	LUCCS-EXPORT-DECLARATION-TC001
Test Case description	The Economic Operator sends an Export Declaration to the Customs system. The declaration satisfies the conditions to enter the Customs system. The Export declaration is registered, accepted, released and definitely closed by the Customs system.
Test Purpose	• Confirm that the Economic Operator is able to successfully send an Export Declaration to the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification of Registered Export Declaration from the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification of Accepted Export Declaration from the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification of Goods release from the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification that the export process is closed.
Pre-conditions	• Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends an Export Declaration (CC515C) to Customs system	CC515C	CC515C is sent (Declarant action)
2 – Declarant receives a notification of Registered Export Declaration (CCX11C) from Customs system	CCX11C	CCX11C is sent (Customs action)
3 – Declarant receives a notification of Accepted Export Declaration (CC528C) from Customs system	CC528C	CC528C is sent (Customs action)
4 – Declarant receives a notification that goods are released (CC529C) from Customs system	CC529C	CC529C is sent (Customs action)
5 – Declarant receives a notification that export process is closed (CC599C) from Customs system	CC599C	CC599C is sent (Customs action)

Post-conditions	Export Customs Declaration (CC515C) is sent by the Economic Operator.
Pass Criteria	Notification of Registered Export Declaration (CCX11C), notification of Accepted Export Declaration (CC528C), notification that goods are released (CC529C) and Closing Export notification (CC599C) are received by the Economic Operator.

LUCCS ☀ MODERN AN EFFIZIENT

ID	LUCCS-EXPORT-DECLARATION-TC002
Test Case description	The Economic Operator sends an Export Declaration to the Customs system. The Export Customs Declaration is not valid, a notification of rejected Export Declaration is sent to the Economic Operator.
Test Purpose	• Confirm that the Economic Operator is able to successfully send an Export Declaration to the Customs System. • Confirm that the Economic Operator receives the notification of rejected Export Declaration from the Customs system.
Pre-conditions	• Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends an Export Declaration (CC515C) to Customs system	CC515C	CC515C is sent (Declarant action)
2 – Declarant receives a notification of rejected Export Declaration (CC556C) from Customs system	CC556C	CC556C is sent (Customs action)

Post-conditions	Export Customs Declaration (CC515C) is sent by the Economic Operator.
Pass Criteria	Notification of rejected Export Declaration (CC556C) is received by the Economic Operator with the related details.

ID	LUCCS-EXPORT-DECLARATION-TC003
Test Case description	The Economic Operator sends an Export Declaration to the Customs system. The Export Customs Declaration is not valid, a notification of technical validation error is sent to the Economic Operator.
Test Purpose	- Confirm that the Economic Operator is able to successfully send an Export Declaration to the Customs System. - Confirm that the Economic Operator is able to successfully receive the notification of technical validation error from the Customs System
Pre-conditions	Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends an Export Declaration (CC515C) to Customs system	CC515C	CC515C is sent (Declarant action)
2 – Declarant receives a Notification of Technical validation error (CC917C) from Customs system	CC917C	CC917C is sent (Customs action)

Post-conditions	Export Customs Declaration (CC515C) is sent by the Economic Operator.
Pass Criteria	Notification of Technical validation error (CC917C) is received by the Economic Operator.

LUCCS
MODERN AN EFFIZIENT

ID	LUCCS-EXPORT-DECLARATION-TC004
Test Case description	The Economic Operator sends an Export Declaration to the Customs system. The declaration satisfies the conditions to enter the Customs system, the Export declaration is registered. The Customs officer decides to reject the Export Declaration, a notification of rejected Export Declaration is sent to the Economic Operator.
Test Purpose	• Confirm that the Economic Operator is able to successfully send an Export Declaration to the Customs System. • Confirm that the Economic Operator receives the notification of Registered Export Declaration from the Customs System. • Confirm that the Economic Operator receives the notification of rejected Export Declaration from the Customs System.
Pre-conditions	• Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	Input data	System response
1 – Declarant sends an Export Declaration (CC515C) to Customs system	CC515C	CC515C is sent (Declarant action)
2 – Declarant receives a notification of Registered Export Declaration (CCX11C) from Customs system	CCX11C	CCX11C is sent (Customs action)
3 – Declarant receives a notification of rejected Export Declaration (CC556C) from Customs system	CC556C	CC556C is sent (Customs action)

Post-conditions	Export Customs Declaration (CC515C) is sent by the Economic Operator.
Pass Criteria	Notification of Registered Export Declaration (CCX11C) and notification of rejected Export Declaration (CC556C) are received by the Economic Operator with the related details.

1.4.2 PROCESS – EXPORT CUSTOMS DECLARATION AT OFFICE OF EXIT

ID	LUCCS-EXPORT-DECLARATION-TC005
Test Case description	The Economic Operator sends an Arrival at Exit to the Customs system. The Arrival at Exit is accepted by the Customs system. The Economic Operator sends an Exit Notification to the Customs system. The Exit Notification is accepted, the Export process is now closed.
Test Purpose	• Confirm that the Economic Operator is able to successfully send an Arrival at Exit to the Customs System. • Confirm that the Economic Operator receives the notification of Exit Release from the Customs System. • Confirm that the Economic Operator is able to successfully send an Exit notification to the Customs System. • Confirm that the Economic Operator receives the notification that export process is closed from the Customs System.
Pre-conditions	• Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends an Arrival at Exit (CC507C) to Customs system	CC507C	CC507C is sent (Declarant action)
2 – Declarant receives a notification of Exit Release (CC525C) from Customs system	CC525C	CC525C is sent (Customs action)
3 – Declarant sends an Exit Notification (CC590C) to Customs system	CC590C	CC590C is sent (Declarant action)
4 – Declarant receives a notification that export process is closed (CC599C) from Customs system	CC599C	CC599C is sent (Customs action)

Post-conditions	Arrival at Exit (CC507C) and Exit Notification (CC590C) are sent by the Economic Operator.
Pass Criteria	Notification of Exit Release (CC525C) and Closing Export notification (CC599C) are received by the Economic Operator.

ID	LUCCS-EXPORT-DECLARATION-TC006
Test Case description	The Economic Operator sends an Arrival at Exit to the Customs system. The Arrival at Exit is not valid, a notification of rejected Arrival at Exit is sent to the Economic Operator.
Test Purpose	• Confirm that the Economic Operator is able to successfully send an Arrival at Exit to the Customs System. • Confirm that the Economic Operator receives the notification of rejected Arrival at Exit from the Customs system.
Pre-conditions	• Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends an Arrival at Exit (CC507C) to Customs system	CC507C	CC507C is sent (Declarant action)
2 – Declarant receives a notification of rejected Arrival at Exit (CC557C) from Customs system	CC557C	CC557C is sent (Customs action)

Post-conditions	Arrival at Exit (CC507C) is sent by the Economic Operator.
Pass Criteria	Notification of rejected Arrival at Exit (CC557C) is received by the Economic Operator with the related details.

LUCCS ⚙
MODERN AN EFFIZIENT

ID	LUCCS-EXPORT-DECLARATION-TC007
Test Case description	The Economic Operator sends an Arrival at Exit to the Customs system. The Arrival at Exit is not valid, a notification of technical validation error is sent to the Economic Operator.
Test Purpose	- Confirm that the Economic Operator is able to successfully send an Arrival at Exit to the Customs System. - Confirm that the Economic Operator is able to successfully receive the notification of technical validation error from the Customs System
Pre-conditions	Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends an Arrival at Exit (CC507C) to Customs system	CC507C	CC507C is sent (Declarant action)
2 – Declarant receives a Notification of Technical validation error (CC917C) from Customs system	CC917C	CC917C is sent (Customs action)

Post-conditions	Arrival at Exit (CC507C) is sent by the Economic Operator.
Pass Criteria	Notification of Technical validation error (CC917C) is received by the Economic Operator.

ID	LUCCS-EXPORT-DECLARATION-TC008
Test Case description	The Economic Operator sends an Arrival at Exit to the Customs system. The Arrival at Exit is accepted by the Customs system. The Economic Operator sends an Exit Notification to the Customs system. The Exit Notification is not valid, a notification of rejected Exit is sent to the Economic Operator.
Test Purpose	- Confirm that the Economic Operator is able to successfully send an Arrival at Exit to the Customs System. - Confirm that the Economic Operator receives the notification of Exit Release from the Customs System. - Confirm that the Economic Operator is able to successfully send an Exit notification to the Customs System. - Confirm that the Economic Operator receives the notification of rejected Exit from the Customs System.
Pre-conditions	Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends an Arrival at Exit (CC507C) to Customs system	CC507C	CC507C is sent (Declarant action)
2 – Declarant receives a notification of Exit Release (CC525C) from Customs system	CC525C	CC525C is sent (Customs action)
3 – Declarant sends an Exit Notification (CC590C) to Customs system	CC590C	CC590C is sent (Declarant action)
4 – Declarant receives a notification of rejected Exit (CC557C) from Customs system	CC557C	CC557C is sent (Customs action)

Post-conditions	Arrival at Exit (CC507C) and Exit Notification (CC590C) are sent by the Economic Operator.
Pass Criteria	Notification of Exit Release (CC525C) and notification of rejected Exit (CC557C) are received by the Economic Operator with the related details.

LUCCS
MODERN AN EFFIZIENT

ID	LUCCS-EXPORT-DECLARATION-TC009
Test Case description	The Economic Operator sends an Arrival at Exit to the Customs system. The Arrival at Exit is accepted by the Customs system. The Economic Operator sends an Exit Notification to the Customs system. The Exit notification is not valid, a notification of technical validation error is sent to the Economic Operator.
Test Purpose	• Confirm that the Economic Operator is able to successfully send an Arrival at Exit to the Customs System. • Confirm that the Economic Operator receives the notification of Exit Release from the Customs System. • Confirm that the Economic Operator is able to successfully send an Exit notification to the Customs System. • Confirm that the Economic Operator is able to successfully receive the notification of technical validation error from the Customs System
Pre-conditions	• Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends an Arrival at Exit (CC507C) to Customs system	CC507C	CC507C is sent (Declarant action)
2 – Declarant receives a notification of Exit Release (CC525C) from Customs system	CC525C	CC525C is sent (Customs action)
3 – Declarant sends an Exit Notification (CC590C) to Customs system	CC590C	CC590C is sent (Declarant action)
4 – Declarant receives a Notification of Technical validation error (CC917C) from Customs system	CC917C	CC917C is sent (Customs action)

Post-conditions	Arrival at Exit (CC507C) and Exit Notification (CC590C) are sent by the Economic Operator.
Pass Criteria	Notification of Exit Release (CC525C) and notification of Technical validation error (CC917C) is received by the Economic Operator.

1.4.3 PROCESS – CONTROL BY OFFICE OF EXPORT

ID	LUCCS-EXPORT-DECLARATION-TC010
Test Case description	The Economic Operator sends an Export Declaration to the Customs system. The declaration satisfies the conditions to enter the Customs system. The Export declaration is registered, accepted and placed under control. The control result is satisfactory, the Export Declaration is released by the Customs system.
Test Purpose	• Confirm that the Economic Operator is able to successfully send an Export Declaration to the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification of Registered Export Declaration from the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification of Accepted Export Declaration from the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification of Export Control from the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification that the export process is closed.
Pre-conditions	• Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends an Export Declaration (CC515C) to Customs system	CC515C	CC515C is sent (Declarant action)
2 – Declarant receives a notification of Registered Export Declaration (CCX11C) from Customs system	CCX11C	CCX11C is sent (Customs action)
3 – Declarant receives a notification of Accepted Export Declaration (CC528C) from Customs system	CC528C	CC528C is sent (Customs action)
4 – Declarant receives a notification of Export Control (CC560C) from Customs system	CC560C	CC560C is sent (Customs action)
5 – Declarant receives a notification that goods are released (CC529C) from Customs system	CC529C	CC529C is sent (Customs action)

Post-conditions	Export Customs Declaration (CC515C) is sent by the Economic Operator.
Pass Criteria	Notification of Registered Export Declaration (CCX11C), notification of Accepted Import Declaration (CC528C), notification of Export Control (CC560C) and notification that goods are released (CC529C) are received by the Economic Operator.

ID	LUCCS-EXPORT-DECLARATION-TC011
Test Case description	The Economic Operator sends an Export Declaration to the Customs system. The declaration satisfies the conditions to enter the Customs system. The Export declaration is registered, accepted and placed under control. The control result is unsatisfactory, the Export Declaration is not released by the Customs system.
Test Purpose	• Confirm that the Economic Operator is able to successfully send an Export Declaration to the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification of Registered Export Declaration from the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification of Accepted Export Declaration from the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification of Export Control from the Customs system. • Confirm that the Economic Operator is able to successfully receive the notification of Goods not released from the Customs system.
Pre-conditions	• Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends an Export Declaration (CC515C) to Customs system	CC515C	CC515C is sent (Declarant action)
2 – Declarant receives a notification of Registered Export Declaration (CCX11C) from Customs system	CCX11C	CCX11C is sent (Customs action)
3 – Declarant receives a notification of Accepted Export Declaration (CC528C) from Customs system	CC528C	CC528C is sent (Customs action)
4 – Declarant receives a notification of Export Control (CC560C) from Customs system	CC560C	CC560C is sent (Customs action)
5 – Declarant receives a notification that goods are not released (CC551C) from Customs system	CC551C	CC551C is sent (Customs action)

Post-conditions	Export Customs Declaration (CC515C) is sent by the Economic Operator.
Pass Criteria	Notification of Registered Export Declaration (CCX11C), notification of Accepted Import Declaration (CC528C), notification of Export Control (CC560C) and notification Export no Release (CC551C) are received by the Economic Operator.

MODERN AN EFFIZIENT

1.4.4 PROCESS – CONTROL BY OFFICE OF EXIT

ID	LUCCS-EXPORT-DECLARATION-TC012
Test Case description	The Economic Operator receives an Exit Control decision notification and after the satisfactory control, the Exit Release notification from the Customs system. The Economic Operator sends an Exit Notification to the Customs system. The Exit Notification is accepted, the Export process is now closed.
Test Purpose	• Confirm that the Economic Operator is able to successfully receive an Exit Control decision notification from the Customs System. • Confirm that the Economic Operator is able to successfully receive an Exit Release notification from the Customs System. • Confirm that the Economic Operator is able to successfully send an Exit notification to the Customs System. • Confirm that the Economic Operator receives the notification that export process is closed from the Customs System.
Pre-conditions	• Connectivity with Customs system is successful • Export Customs Declaration in Goods Released for Export status

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant receives a notification of Exit Control decision (CC561C) from Customs system	CC561C	CC561C is sent (Customs action)
2 – Declarant receives a notification of Exit Release (CC525C) from Customs system	CC525C	CC525C is sent (Customs action)
3 – Declarant sends an Exit Notification (CC590C) to Customs system	CC590C	CC590C is sent (Declarant action)
4 – Declarant receives a notification that export process is closed (CC599C) from Customs system	CC599C	CC599C is sent (Customs action)

Post-conditions	Notification of Exit Control Decision (CC561C) and Exit Notification (CC590C) are received by the Economic Operator.
Pass Criteria	Notification of Exit Release (CC525C) and Closing Export notification (CC599C) are received by the Economic Operator.

ID	LUCCS-EXPORT-DECLARATION-TC013
Test Case description	The Economic Operator receives an Exit Control decision notification, after the control, customs decides to suspend the Export Movement before giving a satisfactory result for the control, an Export Suspension and an Exit Release notification are sent from the Customs system. The Economic Operator sends an Exit Notification to the Customs system. The Exit Notification is accepted, the Export process is now closed.
Test Purpose	• Confirm that the Economic Operator is able to successfully receive an Exit Control decision notification from the Customs System. • Confirm that the Economic Operator is able to successfully receive an Export Suspension notification from the Customs System. • Confirm that the Economic Operator is able to successfully receive an Exit Release notification from the Customs System. • Confirm that the Economic Operator is able to successfully send an Exit notification to the Customs System. • Confirm that the Economic Operator receives the notification that export process is closed from the Customs System.
Pre-conditions	• Connectivity with Customs system is successful • Export Customs Declaration in Goods Released for Export status

Basic Flow of Events		
Actors Actions	Input data	System response
1 – Declarant receives a notification of Exit Control decision (CC561C) from Customs system	CC561C	CC561C is sent (Customs action)
2 – Declarant receives a notification of Export Suspension (CCX18C) from Customs system	CCX18C	CCX18C is sent (Customs action)
3 – Declarant receives a notification of Exit Release (CC525C) from Customs system	CC525C	CC525C is sent (Customs action)
4 – Declarant sends an Exit Notification (CC590C) to Customs system	CC590C	CC590C is sent (Declarant action)
5 – Declarant receives a notification that export process is closed (CC599C) from Customs system	CC599C	CC599C is sent (Customs action)

Post-conditions	Notification of Exit Control Decision (CC561C) and Exit Notification (CC590C) are received by the Economic Operator.
Pass Criteria	Notification of Export Suspension (CCX18C), notification of Exit Release (CC525C) and Closing Export notification (CC599C) are received by the Economic Operator.

ID	LUCCS-EXPORT-DECLARATION-TC014
Test Case description	The Economic Operator receives an Exit Control decision notification and after the unsatisfactory control, the Exit Release notification from the Customs system.
Test Purpose	• Confirm that the Economic Operator is able to successfully receive an Exit Control decision notification from the Customs System. • Confirm that the Economic Operator is able to successfully receive the Exit Release Rejection notification from the Customs System
Pre-conditions	• Connectivity with Customs system is successful • Export Customs Declaration in Goods Released for Export status

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant receives a notification of Exit Control decision (CC561C) from Customs system	CC561C	CC561C is sent (Customs action)
2 – Declarant receives an Exit Release Rejection (CC522C) from Customs system	CC522C	CC522C is sent (Customs action)

Post-conditions	Notification of Exit Control Decision (CC561C) is received by the Economic Operator.
Pass Criteria	Notification of Exit Release Rejection (CC522C) is received by the Economic Operator.

1.4.5 PROCESS –EXIT AFTER STORING

ID	LUCCS-EXPORT-DECLARATION-TC015
Test Case description	The Economic Operator sends a Manifest Presentation to the Customs system. The Manifest Presentation is accepted by the Customs system. The Economic Operator sends an Exit Notification to the Customs system. The Exit Notification is accepted, the Export process is now closed.
Test Purpose	• Confirm that the Economic Operator is able to successfully send a Manifest Presentation notification to the Customs System. • Confirm that the Economic Operator receives the Manifest Validation notification from the Customs System. • Confirm that the Economic Operator is able to successfully send an Exit notification to the Customs System. • Confirm that the Economic Operator receives the notification that export process is closed from the Customs System.
Pre-conditions	• Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	Input data	System response
1 – Declarant sends a Manifest Presentation (CC547C) to Customs system	CC547C	CC547C is sent (Declarant action)
2 – Declarant receives a notification of Manifest validation (CC548C) from Customs system	CC548C	CC548C is sent (Customs action)
3 – Declarant sends an Exit Notification (CC590C) to Customs system	CC590C	CC590C is sent (Declarant action)
4 – Declarant receives a notification that export process is closed (CC599C) from Customs system	CC599C	CC599C is sent (Customs action)

Post-conditions	Manifest Presentation (CC547C) and Exit Notification (CC590C) are sent by the Economic Operator.
Pass Criteria	Manifest validation notification (CC548C) and Closing Export notification (CC599C) are received by the Economic Operator.

ID	LUCCS-EXPORT-DECLARATION-TC016
Test Case description	The Economic Operator sends a Manifest Presentation to the Customs system. The Manifest Presentation is not valid, a notification of Business/Functional Error is sent to the Economic Operator.
Test Purpose	• Confirm that the Economic Operator is able to successfully send a Manifest Presentation notification to the Customs System. • Confirm that the Economic Operator receives the notification of Business/Functional Error from the Customs system.
Pre-conditions	• Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends a Manifest Presentation (CC547C) to Customs system	CC547C	CC547C is sent (Declarant action)
2 – Declarant receives a notification of Business/Functional Error (CC548C) from Customs system	CC548C	CC548C is sent (Customs action)

Post-conditions	Manifest Presentation (CC547C) is sent by the Economic Operator.
Pass Criteria	Notification of Business/Functional Error (CC548C) is received by the Economic Operator with the related details.

LUCCS
MODERN AN EFFIZIENT

ID	LUCCS-EXPORT-DECLARATION-TC017
Test Case description	The Economic Operator sends a Manifest Presentation to the Customs system. The Manifest Presentation is not valid, a notification of technical validation error is sent to the Economic Operator.
Test Purpose	• Confirm that the Economic Operator is able to successfully send a Manifest Presentation notification to the Customs System. • Confirm that the Economic Operator is able to successfully receive the notification of technical validation error from the Customs System
Pre-conditions	• Connectivity with Customs system is successful

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant sends a Manifest Presentation (CC547C) to Customs system	CC547C	CC547C is sent (Declarant action)
2 – Declarant receives a Notification of Technical validation error (CC917C) from Customs system	CC917C	CC917C is sent (Customs action)

Post-conditions	Manifest Presentation (CC547C) is sent by the Economic Operator.
Pass Criteria	Notification of Technical validation error (CC917C) is received by the Economic Operator.

1.4.6 PROCESS – HANDLE RIGHT TO BE HEARD

ID	LUCCS-EXPORT-DECLARATION-TC018
Test Case description	After a control is performed, the Customs sends a notification of the intention to not release the goods to the Economic Operator. The Economic Operator sends the Right to be heard request to Customs System. The Right to be heard request is acknowledged by the Customs System. Then the right to be heard request is accepted by the Customs office, the goods are released, a notification is sent to the Economic Operator.
Test Purpose	• Confirm that the Economic Operator is able to successfully receive the notification of the intention to not release the goods from the Customs System. • Confirm that the Economic Operator is able to successfully sends the Right to be heard request to Customs System • Confirm that the Economic Operator is able to successfully receive the notification on Right to be heard Acknowledgment from the Customs System • Confirm that the Economic Operator is able to successfully receive the notification that goods are released from the Customs System
Pre-conditions	• Connectivity with Customs system is successful • Export Customs Declaration under control

Basic Flow of Events		
Actors Actions	**Input data**	**System response**
1 – Declarant receives notification of the intention to not release the goods (CCX12C) from Customs system	CCX12C	CCX12C is sent (Customs action)
2 – Declarant sends a Right to be heard notification (CCX17C) to Customs system	CCX17C	CCX17C is sent (Declarant action)
3 – Declarant receives a notification on Right to be Heard Acknowledgment (CCX15C) from Customs system	CCX15C	CCX15C is sent (Customs action)
4 – Declarant receives a notification that goods are released (CC529C) from Customs system	CC529C	CC529C is sent (Customs action)

Post-conditions	Notification of the intention to not release the goods (CCX12C) is sent to the Economic Operator.
Pass Criteria	Right to be heard request (CCX17C) is sent by the Economic Operator. Notification on Right to be Heard Acknowledgment (CCX15C) and a notification that goods are released (CC529C) are received by the Economic Operator.

ID	LUCCS-EXPORT-DECLARATION-TC019
Test Case description	After a control is performed, the Customs sends a notification of the intention to not release the goods to the Economic Operator. The Economic Operator sends the Right to be heard request to Customs System. The Right to be heard request is acknowledged by the Customs System. Then the right to be heard request is rejected by the Customs office, the goods are not released, a notification is sent to the Economic Operator.
Test Purpose	• Confirm that the Economic Operator is able to successfully receive the notification of the intention to not release the goods from the Customs System. • Confirm that the Economic Operator is able to successfully sends the Right to be heard request to Customs System • Confirm that the Economic Operator is able to successfully receive the notification on Right to be heard from the Customs System • Confirm that the Economic Operator is able to successfully receive the notification that goods are not released from the Customs System
Pre-conditions	• Connectivity with Customs system is successful • Export Customs Declaration under control

Basic Flow of Events		
Actors Actions	Input data	System response
1 – Declarant receives notification of the intention to not release the goods (CCX12C) from Customs system	CCX12C	CCX12C is sent (Customs action)
2 – Declarant sends a Right to be heard notification (CCX17C) to Customs system	CCX17C	CCX17C is sent (Declarant action)
3 – Declarant receives a notification on Right to be Heard Acknowledgment (CCX15C) from Customs system	CCX15C	CCX15C is sent (Customs action)
4 – Declarant receives a notification that goods are not released (CC551C) from Customs system	CC551C	CC551C is sent (Customs action)

Post-conditions	Notification of the intention to not release the goods (CCX12C) is sent to the Economic Operator.
Pass Criteria	Right to be heard request (CCX17C) is sent by the Economic Operator. Notification on Right to be Heard (CCX15C) and a notification that Goods are not Released (CC551C) are received by the Economic Operator.
